SKILLS

Javascript, React, Redux, Ruby, Rails, Python, Django, Cypress, AJAX, Axios, SQLite3, PostgreSQL, HTML, CSS, jQuery

EXPERIENCE

Clearnomics

New York City, New

York

Software Engineer

(Aug 2019 - Present)

- Maintained ownership over the entire frontend, implemented various new features ranging from dark mode capability and reusable modals to complex admin tables and business logic controlled forms.
- Integrated an end to end testing framework using Cypress that provided over 90% coverage on the site's frontend codebase and closely followed users' potential workflows through the app.
- Produced various fullstack projects that were incorporated into the platform, one of which provided an in-house solution to searching and identifying a single advisor or firm within hundreds of thousands of entries.
- Implemented a framework that allowed clients to embed a subsection of the main application through an iframe and secured authorization through an algorithm that compared domains to a list of allowed addresses.
- Ensured cross-browser compatibility and mobile responsiveness for styling and functionality, such as correcting for IE11 compatibility issues and allowing for the use of swipe motions on mobile devices.
- Constructed a library of reusable components hosted on a private repository that could be used both in the main application as well as future projects, alongside a plethora of useful helper functions.

Campus Mobile Solutions

Urbana Champaign, Illinois

Manager

(Jul 2017 - Nov 2018)

Repair Technician

(Jul 2015 - Jul 2017)

- Supervised new employees, provided training in how to repair over 100 devices, both hardware and software related issues, and instructed on RepairShopr usage.
- Facilitated the opening of a second location, transferring of overhead, scheduling employees, and managing distribution of necessary repair tools and software repair devices.

ACHIEVEMENTS

DeveloperWeek Hackathon NY - **2nd Place** for creating the web app, *Canon Booth*

(Jun 2019)

Professional photoshoot experience using Canon's new CCAPI to control the camera remotely and provide a live stream.

PROJECTS

Slick - (Ruby on Rails, React, Redux, NPM, HTML5, CSS)

[Live Site](#) | [GitHub](#)

Fullstack clone of the popular messaging web app, Slack, implementing action cables for messages.

- Designed an efficient backend schema to implement CRUD for users, channels, and messages and communicate to the frontend through AJAX and various HTTP request types and usage of thunk middleware.
- Established Rails channels, action cables, and websockets to produce a near-identical experience of messaging and notifications in real time.

EDUCATION

App Academy - 1000+ hour full-stack web development program with <3% acceptance rate.

(Spring 2019)

University of Illinois at Urbana Champaign - Bachelor's of Science, Materials Science of Engineering.

(Spring 2018)

Stuyvesant High School - Consistently top ranked high school in NY & nationwide.

(Spring 2014)
